

FIRST TRUST ALL EQUITY ALLOCATION PORTFOLIO R2

ADVANTAGES OF STRATEGY INVESTING

Transparency

of the stock selection process, portfolio holdings and individual stock weightings

Automated

buy and sell decisions which help to eliminate unwanted emotions from the investment process

No Style Drift

from manager-driven trading

Diversification

discipline, and a rebalancing opportunity to help decrease volatility and potentially increase returns
(However, diversification does not guarantee a profit or protect against a loss.)

INVESTMENT OBJECTIVE

The First Trust All Equity Allocation Portfolio R2 seeks to provide above-average total return by adhering to five specialized investment strategies. It invests in a portfolio of stocks which are selected by applying pre-determined screens and factors and is automatically rebalanced annually. In addition to this annual rebalancing of the individual component strategies back to their original weighting, new stocks are also selected by reapplying the underlying strategies. There can be no assurance that the Fund will achieve its investment objective.

Past performance is no guarantee of future results. Investment return and principal value of the portfolio will fluctuate causing units of the Fund, when redeemed, to be worth more or less than their original cost. Returns are net of all estimated expenses and assume that all dividends received during a year are reinvested monthly. It is important to note that the Strategy may underperform the S&P 500® Index in certain years and may produce negative results. Indexes are for illustrative purposes only. Indexes do not charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown. All index returns assume that dividends are reinvested when they are received. Visit ftportfolios.com for the most recent performance information.

Periods of less than one year are not annualized.

Indexes are unmanaged and an investor cannot invest directly in an index.

*The inception date for this share class is 7/25/11. Performance from 8/1/07 to 7/25/11 for this share class is calculated by using the actual performance of the R1 share class, which has an inception date of 8/1/07, and applying the expense ratio of the R2 share class.

RISK FACTORS

Plan sponsors and participants should consider the Fund's investment objective, time horizon, risks, charges and expenses carefully before investing. Contact your financial advisor, visit ftportfolios.com, or call First Trust Portfolios L.P. at 877.937.4015 to request an Information Statement, which contains this and other information about the Fund. Read it carefully before you invest.

The First Trust Collective Investment Funds are not mutual funds and their units are not deposits of the Trustee, Hand Benefits & Trust Company, or the Sub-Advisor, and are not insured or guaranteed by the Federal Deposit Insurance Corporation or any other agency. The units are securities which have not been registered under the Securities Act of 1933 and the Fund is exempted from investment company registration under the Investment Company Act of 1940. Therefore, participating plans and their participants will not be entitled to the protections under these Acts. Management of the Trust, however, is generally subject to the fiduciary duty and prohibited transaction rules under the Employee Retirement Income Security Act of 1974.

As with any investment, you can lose money by investing in the Fund. Before investing you should consider carefully the following risks that you assume when you invest in the Fund. For more information regarding the following risks, please consult the Fund's Information Statement.

The Fund is subject to market risk which is the risk that a particular security owned by the Fund or shares of the Fund in general may fall in value.

An investment in a fund containing securities of non-U.S. issuers is subject to additional risks, including currency fluctuations, political risks, withholding, the lack of adequate financial information, and exchange control restrictions impacting non-U.S. issuers.

Changes in currency exchange rates and the relative value of non-U.S. currencies may affect the value of the Fund's investments and the value of the Fund's shares.

The Fund invests in small and/or mid capitalization companies. Such companies may experience greater price volatility than larger, more established companies.
