AVERAGE ANNUAL TOTAL RETURNS & FUND EXPENSES
The performance data quoted represents past performance and does not guarantee future results. Current performance may be lower or higher than the performance data quoted. The investment return and unit value of the CIF will fluctuate, and units may be worth more or less than their original cost when redeemed. Returns for periods less than one year are cumulative. Performance would have been lower if fees and expenses had not been waived in various periods. Total returns assume the reinvestment of all distributions at net asset value and deduction of all CIF expenses. Performance for other unit classes will vary due to differences in class expenses.

ClearBridge’s growth investing style may become out of favor and/or its security selection process may prove incorrect which may have a negative impact on the CIF’s performance. Diversification does not guarantee a profit or protect against a loss. Active management does not ensure gains or protect against market declines. Plans and their participants could lose money by investing in the CIF.
