## Performance

	QTD	YTD	1Y	3Y	5Y	10Y	SINCE INCEP	STD DEV SINCE INCEP
Hamilton Capital Dynamic Bond CIF R2	3.20%	4.23%	4.23%	-0.25%	N/A	N/A	-0.23%	N/A
Primary Benchmark	6.34%	6.02%	6.02%	-2.91%	N/A	N/A	-2.32%	N/A

\*R2 shares were not funded as of December 31, 2023. R2 shares are available to eligible qualified retirement plan trusts in which Hamilton Capital does not serve as the plan's service provider. Performance for R2 shares prior to its inception is derived from the historical performance of R shares (inception 10/02/2020), which has been adjusted to reflect a 35-bps management fee paid to Hamilton Capital resulting in higher expenses and hence lower returns.

## Fund Overview

- The objective of the Hamilton Capital CIF Portfolios is to cumulatively build retirement assets by compounding high quality absolute investment returns over time. Within this context, Dynamic Bond seeks current income by investing in a diversified portfolio of fixed income securities. Further, it seeks relative capital protection and to limit market losses so future returns can more quickly build on past returns.
- Asset allocation in the Dynamic Bond CIF is both flexible and dynamic. Management continuously searches for relative value among global fixed income, high yield bonds, cash equivalents and alternatives. As fundamental investment conditions change, Dynamic Bond adjusts to the most attractive mix of investment options.
- Management is given wide latitude to choose the specific asset classes in which the portfolio will invest at any point in time. This allows greater emphasis to be placed on the most promising assets and helps avoid mandatory exposure to unproductive assets that can increase risk and reduce investment returns.
- Further, protecting capital from large losses is also an important objective. Principal risks include credit risk, interest rate risk and currency risk. Also, market risks may emerge from some asset classes. Management seeks to address these risks and protect capital by adjusting the average maturity and the mix of assets that are included in the portfolio.
- Given the portfolio's focus on absolute returns and the protection of capital, there will be periods when returns deviate from its primary benchmark. These deviations are normal and expected. To fairly evaluate the strategy's effectiveness, performance should be evaluated over a complete market cycle, which is often 5 years or longer.

This information is for illustration and discussion purposes only. It is not intended to be, nor should it be construed or used as investment, tax, ERISA, or finance advice, or an offer to sell, or a solicitation of any offer to buy, shares of or in any other fund managed or advised by Hamilton Capital or sponsored by HBT.

No representation is made that the Fund will or is likely to achieve its objectives, the HC investment process or risk management will be successful, or that an investor in the Fund will or is likely to achieve results comparable to those shown or will make any profit or will not suffer losses or loss of principal. An investment in the Fund involves risks. As market conditions fluctuate, the investment return and principal value of any investment will change. Past performance is not indicative of future results.

The material is as of the date indicated, is not complete, and is subject to change. Certain information, including information related to indexes, has been provided by and/or is based on third party sources, and, although believed to be reliable, has not been independently verified and HC is not responsible for errors from these sources.

Any information, statements and opinions set forth are general in nature, are not directed to or based on the financial situation or needs of any particular investor, and do not constitute, and should not be construed as, investment advice, a forecast of future events, a guarantee of future results, or a recommendation with respect to any particular security or investment strategy. Investors seeking financial advice regarding the appropriateness of investing in any securities or investment strategies should consult their financial professional.

The Hamilton Capital Dynamic Bond CIF primary benchmark is 90% Morningstar Intermediate Core Bond category, 8% Morningstar High Yield category, and 2% Morningstar Taxable Money Market category.

### Hand Composite Employee Benefit Trust

HAMILTON CAPITAL DYNAMIC BOND CIF IS A COLLECTIVE INVESTMENT FUND (CIF) CREATED BY THE HAND COMPOSITE EMPLOYEE BENEFIT TRUST AND SPONSORED BY HAND BENEFITS & TRUST COMPANY, A BPAS COMPANY, THAT INVESTS IN THE STRATEGIES OF HAMILTON CAPITAL WHICH SERVES AS THE SUB-ADVISOR TO THE FUND.

### Principal Investment Risks

*Equity securities are subject to price fluctuation and possible loss of principal. Small and mid-cap stocks involve greater risks and volatility than large-cap stocks. International investments are subject to special risks, including currency fluctuations and social, economic and political uncertainties, which could increase volatility. These risks are magnified in emerging markets. Fixed-income securities involve interest rate credit, inflation and reinvestment risks; and possible loss of principal. As interest rates rise, the value of fixed-income securities falls. Derivatives, such as options and futures, can be illiquid, may disproportionately increase losses, and have a potentially large impact on Fund performance. The model used to manage the Fund's assets provides no assurance that the recommended allocation will either maximize returns or minimize risks. The portfolio may at times have a high allocation to cash and equivalents which may make it fail to meet its investment objective. Plans and their participants could lose money by investing in the CIF. A more complete description of the principal risks of investing in the CIF can be found in the CIF's Investment Policy Statement which is available upon request by contacting Hamilton Capital.*

*The CIF is not a mutual fund. Its shares are not deposits of Hand Benefits & Trust Company, a BPAS company, or Hamilton Capital, LLC, and are not insured by the Federal Deposit Insurance Corporation or any other agency. The CIF is a security which has not been registered under the Securities Act of 1933 and is exempt from investment company registration under the Investment Act of 1940. The performance quoted here does not guarantee future results. As market conditions fluctuate, the investment return and principal value of any investment will change. Diversification may not protect against market risk. There are risks involved with investing, including possible loss of principal. Before investing in any investment portfolio, the client and the financial professional should carefully consider client investment objectives, time horizon, risk tolerance, and fees.*

This collective investment fund is available for investment by eligible qualified retirement plan trusts only.
